# SUSTAINABLE DEVELOPMENT GOALS

Recently we have identified our social, environmental and climate related impact. The Sustainable Development Goals are a call to action to end poverty, protect the planet and ensure peace and prosperity everywhere.

Our own program which is encouraging the education of children in the cocoa-growing region of Kyela, Tanzania by building schools and educating farmers.

Reducing the environmental impacts thanks to a water treatment installation based on biofermentation. The white roof slows down warming-up of the building. The latest technology for air-conditioning and ventilation.

Last year we avoided the emission of 1309 tons of CO2 by choosing renewable energy. Our 4000 solar panels produce 30% of our electricity needs.

We are one of the founding members of the 'Beyond Chocolate' initiative.

Our efforts impact following SDG goals:

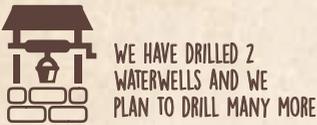

We have received the SDG pioneer award

# Our PROGRAM

The "Cocoa for Schools" is a NGO founded by Fons Maex and it is committed to improve the lives of thousands of cocoa farmers and their families in the Kyela, Busokelo and Rungwe districts of Mbeya, Tanzania. The program has two parts: community development and farmer productivity enhancement. The school building program is today the main activity in the community development. We believe a good education is the key to lift people out of poverty.

SINCE 2015 COCOA FOR SCHOOLS  
HAS INVESTED IN THE PROJECT
